

## **SOUTH CENTRAL COAST DISTRICT**

(Status of Local Coastal Programs as of June 30, 2001)

### **County of Santa Barbara**

1. Number of segments - 0
2. Summary status:

a. The LUP was first certified with suggested modifications on December 12, 1980, and the zoning portion on June 17, 1982. Following three more LUP resubmittals and one zoning portion resubmittal, both were effectively certified on August 11, 1982; with the County assuming permit-issuing authority on September 1, 1982.

An area of deferred certification (ADC) in the Summerland area (Bougerie/Glenn/Roberts properties) was created on August 11, 1982, and covered 64 acres. The main issues were urban-rural boundary, density of development, appropriate land uses and provision of water and sewer. It was resolved by the Commission certification of an LCP for this area on October 14, 1992. The LCP for this area was effectively certified by the Commission on February 16, 1993, the date on which the County assumed permit-issuing authority for this area.

The Commission effectively certified the zoning ordinances for the community of Isla Vista on June 13, 1989, which also resolved issues of allowable zoning density in an area of deferred certification in Isla Vista. On March 17, 1993, the Commission certified an amendment to the original LCP affecting land use and zoning designations on miscellaneous parcels and portions of parcels throughout the coastal zone which were inadvertently excluded in the original certification of the LCP. The Commission awarded the county an LCP planning grant in 1999 to update a portion of the LCP for the Ellwood Shores area. The approved work program's intent is to respond to CCC 1998 findings and suggested modifications, adopted in its action on an LCP amendment request, regarding issues such as restricting the types of trails in environmentally sensitive habitats, and addressing additional issues regarding the land use and natural resource elements, and site specific development standards. Although some delays were experienced with certain mapping tasks, the County continues to make progress on the update, currently focused on alternatives' evaluation (August 2001).

3. Areas of Deferred Certification:

a. Haskell's Beach ADC. This was created on August 11, 1982, and includes about 73 acres. The main issues are public access, environmentally sensitive habitat, shoreline erosion, density, urban-rural boundary and water service. A 1985 coastal permit approved a major 400-room hotel complex on a portion of this area. The County resubmitted an LCP for this ADC but then withdrew it prior to Commission action. This ADC remains unresolved.

b. Channel Islands ADC. This was created on August 11, 1982, and includes the four islands of San Miguel, Santa Rosa, Santa Cruz and Santa Barbara. Issues are oil, public access and rare and endangered species. All are unresolved at this time and there is no change in status since the last report.'

**City of Santa Barbara**

1. Number of segments - 2
2. Summary status:

**a. City Segment**

The LUP was certified as submitted on January 22, 1981. The zoning ordinance was submitted in October, 1983, but withdrawn, pending revisions in the waterfront area. A resubmitted zoning ordinance for the City Segment was certified with suggested modifications on May 13, 1986. A second resubmitted zoning ordinance was certified without modifications on November 12, 1986, the

date on which the City assumed permit-issuing authority for all of the City Segment.

**b. Airport/Goleta Slough Segment**

The LUP was certified with suggested modifications on May 20, 1982. The City prepared an Airport Master Plan and LUP for the Airport/Goleta Slough area. The Implementation Plan (zoning portion) was certified with suggested modifications by the Commission on June 14, 1991. The total LCP was effectively certified by the Commission on December 11, 1991, also the date on which the City assumed permit - issuing authority for this segment.

3. Area of Deferred Certification: None.

4. Amendments: None.

**City of San Buenaventura**

1. Number of segments - 0

2. Summary status:

- a. The Commission denied the first LUP on October 7, 1981 and certified it with suggested modifications on December 16, 1981. A resubmitted LUP was certified with suggested modifications on both March 19 and December 17, 1982.

The City accepted these suggested modifications and the LUP was effectively certified on January 25, 1984.

b. The zoning portion was certified with modifications on July 29, 1983. The City accepted the suggested modifications, including a categorical exclusion approved in October 1983, and assumed permit-issuing authority on February 23, 1984.

c. The total LCP for the Ventura Harbor area (a former LCP segment) was effectively certified by the Commission on May 21, 1981, the first time it had been considered. This area's LCP was consolidated into the total City LCP as part of the Commission's approval of LCP Amendment No. 1-90 (Major), in 1990.

**City of Oxnard**

1. Number of segments - 0
2. Summary status:
  - a. The LUP received effective certification on May 18, 1982, except for the Oxnard Shores, Channel Islands Harbor, and Mandalay Beach areas. A categorical exclusion for most of Oxnard Shores (except for the uncertified shorefront lots) was approved on June 12, 1985.
  - b. The zoning portion of the LCP was effectively certified on April 10, 1985, and the City assumed permit-issuing authority on April 18, 1985. The City's post-certification map illustrating Commission permit and appeals jurisdiction was revised on April 10, 1996.

The Oxnard Shores was created on May 18, 1982. The major issues were public access and shoreline erosion. These were resolved by a Commission-certified resubdivision for the area as part of a resubmitted LCP on June 7, 1988. Commission effective certification occurred on August 10, 1988.

The Channel Islands Harbor ADC was created on May 18, 1982, and included the entire County-owned Harbor within the City of Oxnard. The major issue was whether the City or the County had planning jurisdiction. This was resolved in the City's favor, and the Commission certified the LCP as resubmitted on December 10, 1986.

The Mandalay Beach ADC was created on May 18, 1982, and included about 100 acres. The issues were public access, shoreline erosion and density of development. The resubmitted LCP was certified on April 21, 1987, and resolved all of these issues.

3. Areas of Deferred Certification: None.

**County of Los Angeles (part)**

1. Number of Segments - 4 (For remainder of segments see South Coast Area)

2. Summary Status:

a. **Malibu/Santa Monica Mountains**

1. The LUP was submitted in December 1982. This LUP involves a large complex geographic area with many complex LCP issues, including access, and the cumulative impact of new development. On March 24, 1983, the Commission found substantial issue with the LUP and denied it. The LUP was certified with suggested modifications on June 13, 1985. The original LUP was resubmitted again and certified with suggested modifications on November 19, 1985. A revised LUP incorporating many of the suggested modifications submitted in October 1986 and certified as submitted (and therefore effectively certified) on December 11, 1986. A portion of this segment was incorporated into the new City of Malibu on March 28, 1991.
2. Submittal date for the zoning portion of the LCP is unknown. A partial implementation program was denied by the Commission as inadequate on July 10, 1990. The Commission awarded an LCP planning grant for the County to complete the zoning for this segment in June, 1998. The County's workplan is a two year effort and submittal of the zoning is expected in June, 2001.

The Commission awarded three LCP grants (1997, 1998, and 2001) to the County for work a three-phase planning program to develop the SMM LCP segment. As of July 2001, the County has nearly completed the IP Public Review Draft and has progressed to the third phase of the work program, during which they will complete the Public Review Draft, proceed to County hearings and carry the LCP through certification.

3. Area of Deferred Certification: None.

4. Amendments:

- LUP No. 1-97 (Major) – Approved 3/98 (w/suggested modifications); the modifications were not accepted by the County and the amendment expired.

**City of Malibu**

1. Number of segments - 0
2. Summary status:
  - a. This City was incorporated on March 28, 1991. The City of Malibu is geographically located within the confines of the certified L. A. County Malibu/Santa Monica Mountains Land Use Plan. The City has completed its general planning and is preparing a new LCP in conjunction with a general plan. The City completed part of its LCP Issue Identification and an LCP planning grant application for funding to complete LCP Land Use Plan was awarded in 1998. The contract has now expired and the city has completed an administrative draft of the LUP. Local hearings and final submittal is not expected until 2001.
  - b. In September 2000, the Governor signed AB 988, the Malibu Bill, into law. The bill requires that the CCC draft and submit to Malibu an LUP by January 15, 2002. The bill also requires that the CCC adopt an LCP for the City of Malibu by September 15, 2002. As of August 2001, staff members in the South Central office, in conjunction with an outside consultant, are have completed a draft LUP for public review.
3. Area of Deferred Certification: None.
4. Amendments: None.

**University of California at Santa Barbara (UCSB)**

1. Number of segments - 0
2. Summary status:
  - a. The Long Range Development Plan (LRDP) was certified on March 17, 1981. The University is complying with the conditions of approval, including commencement of the faculty housing project and submittal of the wetlands enhancement plan, and is regularly sending the Commission the required notices of pending development.
3. Area of Deferred Certification: None.
